The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 27 recites the limitation "poly(trimethylene-ethylene ether) glycol" in line 2.

There is insufficient antecedent basis for this limitation in the claim.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 22-26, 37 and 39 are rejected under 35 U.S.C. 102(b) as being anticipated by Makin et al.

Makin et al disclose lubricant compositions comprising polyethers and hydrofluoroalkanes. The polyethers taught as suitable include copolymers comprising oxyethylene and oxypropylene units. Applicants' recitation of "derived from renewable resource" is not seen as imparting patentability to the rejected claims. The hydrofluoroalkanes are seen as meeting applicants' limitation to a friction modifier.

Therefore the reference anticipates the rejected claims.

Claims 28 and 29 ^{and 30} are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 1-21, 34, 36, 38 and 40-44 are allowed.
